PlaneSpotter

The aircraft over your head, live.

SET UP IN 2 MINUTES

1. **Plug in the USB-C cable.**
   Any phone charger works.
2. **Scan the code on the screen**
   with your phone's camera.
3. **Pick your Wi-Fi and type your town.**
   Press Save. That's it.

THE BUTTON

Press	Switch between Aircraft, ISS and Auto
Hold 3 s	Settings: Wi-Fi, town, units, dark theme…
Hold 10 s	Erase everything and start again

The closest aircraft, its route and a radar of everything around you.

• LIVE data is current

DELAYED a few seconds behind

OFFLINE screen: nothing shown is live; it says why

★ rare aircraft and emergencies take over the screen

ISS 10 min before it's visible: where to look

Wi-Fi: use your home Wi-Fi, a guest network without a sign-in page, or your phone's hotspot (2.4 GHz only). Updates install by themselves. Data: adsb.lol, adsbdb.com, CelesTrak, GeoNames.
